I'll give you a **3-day Mastery Plan** using **Spaced Repetition Learning (SRL)** ONLY for the **11 weak questions** you got wrong.
This plan will make you memorise + master them permanently.

🔥 3-DAY SQL MASTERY PLAN (Spaced Repetition Technique)
Focus: The 11 questions you missed.

DAY 1 — EXPLANATION + SLOW PRACTICE (Understanding Phase)
Goal: Build 100% clarity.

1️⃣ Study these topics again (slowly):
- WHEN to use NOT IN
- BETWEEN correct usage
- LEN + REPLACE
- IS NULL vs = NULL
- UPDATE queries syntax
- Basic INSERT patterns

🔥 Day 1 Practice (Re-solve all 11 wrong questions — slowly)
Do these queries again:
✔ LEN + REPLACE
  28. Find names with more than 1 space
  29. Replace spaces with underscores
  30. Display name + its length
✔ IN
  35. City NOT IN ('Mumbai','Pune')
✔ BETWEEN
  37. Age between 20–30
  38. emp_id between 100–200
  39. Name length between 5 and 12
✔ NULL
  43. Update NULL department
  44. Joining_date NOT NULL
✔ UPDATE
  47. Increase IT salary by 10%
  48. Salary < 40000 → set 40000

DAY 2 — ACTIVE RECALL (Fast recall round)

Goal: Check memory → write queries **without seeing notes**.
What to do:
1. Rewrite all 11 queries **from memory**
2. Set timer: **1 minute per query**
3. Don't look at your Day 1 notes
4. After writing, compare with correct solutions

If 8/11 correct → GREAT
If less than 8 correct → Do another round

⬤ **DAY 3 — SPACED REPETITION (Stress Test Round)**
Goal: Push queries into long-term memory.
Step 1:
Shuffle the 11 questions (I can shuffle for you)
Step 2:
Solve them **twice**:
⬥ **Morning (fresh mind)**
⬥ **Evening (reinforcement)**
Step 3 — Rapid Fire (Final Test)
Answer each of these WITHOUT thinking:
- NOT IN → syntax?
- BETWEEN → syntax?
- LEN + REPLACE → formula?
- UPDATE increase by % → formula?
- How to set null values?
- How to find length between X and Y?

If you can answer ALL → Mastered.

 After 3 Days — You Will Observe:
✔ Queries start coming automatically
✔ No more confusion in BETWEEN
✔ UPDATE statements will feel easy
✔ NULL logic will be crystal-clear
✔ Your SQL confidence will jump 200%

⬡ **BONUS (Optional but Powerful)**
On Day 4, I can take your **Mini SQL Test (15 questions)**
only on your weak areas to verify mastery.
